

PIEp Research School and the Innovation Capability CIG (ICAP) invite you to:

The ICAP Creativity Challenge

Explore your physical and mental abilities as we plan to meet for a day and a half meeting in the Stockholm archipelago. This time we will focus on creativity and ways to implement and foster creativity in higher education. Surrounded by breath taking scenery the workshop format involves: group work, round table discussions and self-assessment methods. The event is framed by a physical challenge that for those inexperienced might turn out to be an escapade in coping with sore muscles and blisters. The objective is to better understand creativity, to experience self-assessment methods and to condensate experiences and thinking while having lots of fun and memorable moments.

Place: Stockholm archipelago, Ljusterö

Date: May 28-29th

The number of participants are limited due to safety reasons so please [register](#) as soon as possible!
